About Us

Surya is Sanskrit for “Sun.”

This truly represents us, as everything revolves around the sun and brings life. We prioritize client satisfaction over everything else and bring life to emerging technologies.

We have been a leader in IT Consulting & Staffing for over 20 years and are one of the largest diversity staffing firms in the industry.

- Surya Systems applies proprietary methodologies and accelerators to increase the speed of projects, reduce risk and increase functionality according to each client's needs.
- We work closely with clients to provide consulting and development services for major software technology platforms across industries.
- We have deep expertise in designing, building, testing, and deploying.

Why Surya?

- Surya is the bright light that brings you technology solutions that address AI, Machine Learning, Digital Transformation and more. With over 20 years' experience solving technology challenges, Surya brings industry knowhow and the knowledgeable team you need.
- At Surya, we will not let you fail. We understand our clients' need for success and count on them to share with you how well we perform.
- Bringing life to emerging technology is at the root of why we do what we do. Our achievement always lies in our client's accomplishments and continued growth.
- We are chosen for reasons beyond the exceptional service we provide to clients.
 - Customer centric approach
 - Agility in collaboration
 - Responsiveness
 - Unmatched quality
 - Skilled personnel

Our Approach

Like everything revolves around the sun, all our processes and metrics revolve around client success. At Surya Systems, we combine world-class technology consulting services with being a trusted partner to our clients. Our goal is to exceed your expectations and goals.

- Our recruitment process driven; it is holistic and comprehensive, and covers the entire spectrum of IT.
 - We build a resource pool of IT and Non-IT consultants around new or emerging technologies
 - We handle a wide array of requirements
 - For the many specialist applications that Surya Systems services, we are able to source candidates from one of the best quality data pools in the industry and in-house database which we have developed over the years
- Resume turnaround time of less than **48** hours
- **98%** retention rate
 - Over 75% of our consultants are on our payroll
 - We offer career paths for our consultants
 - We have mature practice areas that allow for employee growth
 - We provide ongoing training to give our consultants an edge in the market
- We guarantee consultant availability and starts

Our Practices

CONSULTING

True consulting requires listening to clients' needs and understanding their challenges to affect their business.

Our team shares the best approaches to the solution and works to deliver the most effective solution. Ask us how!

TRAINING

We learn to gain knowledge, but train to achieve perfection. Training has always been of utmost importance for its magnifying effect on the client's business.

We cater to all levels of training needs.

TECH STAFFING

Our goal is to bring our clients the best talent for their positions. Identifying and attracting top talent requires a day-to-day exercise, building relationships with candidates across technology.

From project management, to BI, to development, to infrastructure and support, our team knows how to find the best people and find them the best places to work.

Areas of Expertise

Whether you need us to truly consult by placing our team on the project, or you need a person to work with on your team, we can help. Our technology experience stretches across a wide array of technologies working to solve client's critical business initiatives.

CLOUD COMPUTING

We bring cost-effective and bleeding-edge innovation that allows businesses to stay competitive.

DIGITAL TRANSFORMATION

We work with your team to bring your systems and digital properties up to the 2020 standard and beyond.

QA

Surya helps you improve the quality and performance of your software applications with faster time to market and reduced testing costs.

BUSINESS INTELLIGENCE

We help you make informed decisions to employ the right technologies that align with your business needs.

ROBOTIC PROCESS AUTOMATION

We assist you by building out your RPA strategy, and defining repeatable tasks and activities in your process to create robots that reduce human workload.

APPLICATION DEVELOPMENT

Surya builds, tests, and deploys mobile apps that run smoothly across devices and platforms.

CRM

From product selection to comprehensive implementation, to supporting your team, we assist you in building the tool you require.

ERP

We offer everything from product selection through comprehensive implementation, to quality education and support of your IT team.

WORKDAY

You can count on Surya for functional or technical support, deployments, and optimizations through Workday.

DATA SCIENCE

Creating your data strategy, building your data warehouse, visualizations, and developing business intelligence to drive your business success.
